## ENVIRONMENTAL POLICY

Aerzen Machines Limited recognise their responsibility to protect the environment. Our concern for the environment must be set in context against other aspects of the business. In order to uphold these responsibilities we have adopted the following policy to comply with the Environmental Protection Act 1990

1. Prevent, reduce and control pollution by monitoring and regular checks of our operating systems.
2. Prevent, reduce and recycle wherever possible all waste streams from the business, including metal, paper, plastics, oil and wood.
3. We will carefully dispose of all waste products that cannot be recycled by a recognised and certified method
4. We will optimise our fuel consumption by using energy efficient heating systems. We will continue to reduce Electricity, Gas and Water consumption by economic means and limiting unnecessary use. KPI,s for consumption shall be a standard measure of Company performance.
5. Maintain the high standard of visual appearance, cleanliness and tidiness of our buildings and landscaping. By good housekeeping, regular inspections and maintenance.
6. Take into consideration environmental issues when designing new products
7. Communicate this environmental policy to all members of staff and make it available to the public as appropriate.
8. A commitment to continuous improvement in all the above categories

Overall responsibility for environmental policy and performance rests with the Board of Directors
